Comments about [Eat The Elephant](#) - A Perfect Circle

- Gardall

Anyone get warped records? It's very minor on appears only in the center. Adding my record wait lays it flat, but it's annoying.

- **GawelleN**

My copy doesn't sound good. It's not noisy but it sounds like it was just ripped from a CD file. It's flat and sounds kinda like a bootleg. Anyone else have this issue? I wonder how the back sounds. Maybe it's just the white wax

- **Landarn**

I agree. It sounds just like the black LP. All three versions I have (black, white, red and blue) have surface noise on Disillusioned, The Doomed, So Long and Thanks for All the Fish, Hourglass, and Get the Lead Out. Basically, all the quieter songs. It's annoying. But it sounds better than the CD and digital.

- **I_LOVE_228**

Not really, I think it sounds great. My only issue is a bit of no fill in some places. But the sound is fantastic. The production may not be to your taste though.

- **Gold as Heart**

It sounds identical to the black LPs as far as I can tell. It doesn't sound like a CD at all, in my opinion. The red and blue release is a different story. It's more noisy.

- **nadness**

How is this cover different than the standard black vinyl?

- **EXIBUZYW**

I think they're the same except they're flipped - so the hype sticker is on the opposite side, like if you were looking at them in a shop the black vinyl would have the long hair weirdo, the white vinyl would have the bald head weirdo. aside from that the only diff i saw was the hype sticker notes very small that's its white vinyl. Oddly enough my local shop had the white version for 5 bucks less!

- **Dancing Lion**

I'd like to know the answer to this as well. I don't see it.

- **Dori**

I know the record label really screwed retailers, collectors, and the fans by promising too many of the white pressings and not delivering...

- **Der Bat**

They are releasing a Red/Blue version this summer - grab it if you are looking for a variant:

- **Thorgahuginn**

Say what you want about the looks but it sounds beautifully! Big up!

- **Whitesmasher**

Anyone else have the labels on the wrong side on side C and side D? White Indie version.

- **Shou**

Yes...mine has label C on D side and vice versa.....

- **Wenyost**

Nope, right label on right side! You just have an extra limited one :)

- **Whiteflame**

How "limited" is this version? Anyone know how many were pressed?

- **Kahavor**

They certainly are selling black ones. It wasn't easy fo me to get a copy. I pre ordered one, canceled. I showed up at a huge revord store on release morning. They had none

- **Kelezel**

There are 500 ltd to UK . 5000 ltd worldwide.

- **Tebei**

I just read on lostinvinyl.org that 5000 copies were pressed worldwide.

- **Kardana**

Not so limited I Guess, looks like the complete first batch for Europe & US is the white vinyl release
